INDEX TO VOLUME XXVIII.

GENERAL ALPHABETICAL INDEX.

NOTE.—*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference).*
*Illustrated articles are indicated by *.*

A

Accumulators. By Williams, (D. R.) 403
Boese and Blot, (D. R.) 435
Boese system, (D.) 145
Celluloid in, (D.) 231
Engel system, (D.) 636
Future inventions. By Warren, (D.) 22
Glass jars, (D.) 53
Gueicher system, (D.) 637
"Lamina," description, (D.) 85
Lead, Theory of. By Elbs, (D.) 339; Fitz Gerald (D.) 231; Liebenow, (D.) 85
Measuring voltage of. By Hopfelt, (D.) 671
New York Custom House, 674
Plates, Life of positive. By Perry, (D.) 465
Progression. By Vogel, (D.) 339
Reactions in. By Liebenow, (D.) 339
Telegraph and signal work, Wilmington, Del. By Hall, 38*
Willard improved, 206*
(See also Central Stations, Accumulators; Railways, Electric, Accumulators.)
Acetylene
Electrolytic nature, 570
Is it an electrolyte? By Bredig and Usoff, (D.) 465
Lighting. By Pellissier, (D.) 367, 432
Efficiency, (D.) 256
Motors for bicycles, 27
Actinometry, Electrochemical. By Marechal, (D. R.) 23, 87
Adams-Bagnall arc lamp, 341
"Adirondack," Electric lighting on, 37*
Admittance and impedance loci. By Bedell, 567*
Adulteration, Rontgen rays in detecting, (D.) 501
Akron dynamos at Barberton, 406*
Alloys
Antimony and iron, Magnetic properties, 66
Electrical resistance. By Lord Rayleigh, (D.) 84
Magnetization of, Experiments. By Weiss, (D. R.) 22
Preparing. New method. By Moissan, (D.) 85
Alternating current circuits, Induction phenomena. By Millis, (D.) 465
Alternating current curves
Determining. By Behn-Eschenberg, (D.) 232; Gasnier, (D. R.) 316; Michalke, (D.) 204
Induction phenomena. By Millis, (D.) 465
Tracing, New method. By Rodgers and Burnie, (D. R.) 175; Drexler, (D. R.) 404
Alternating-current rushes in condensers. By Berry, (D.) 315; Scattergood, (D.) 174, 202, 230, 259
Alternating currents
Combined and continuous, (D.) 283
Combined with direct currents on a three-wire system, 275*
Continuous generation of high-frequency. By D'Arsonval, (D.) 258
Graphical treatment of problems. By Heyland, (D.) 499
Measurement of. By Campbell, (D.) 53
Parallel circuits. By Bedell, (D) 537, 664
Principles. By Hay, (D.) 53
Alternating from direct currents. By Patten, 448*
Alumina factory at Larne. By Sutherland, (D. R.) 285
Aluminum, Plating with copper. By Margot, 285; (D.) 537
Aluminum works, Niagara Falls. By Dunlap, (D.) 86
American Association for the Advancement of Science at Buffalo. By Hale, 213, 215*, 276
American Bell Telephone Co.
Opposition to. By Frost, 555
Relations with Western Union, 242, 350
American Chemical Society, Buffalo meeting, 216
American Electro-Therapeutic Association, Meeting, Boston, 328, 426, 445, 455
American Institute Electrical Engineers, Meeting, 383, 447, 514, 775
American Institute Fair, Electrical exhibits, 437
American Society of Mechanical Engineers, Papers, 714
American Street Railway Association
Attendants, 526
Exhibits, 527*
Notes, 461, 478
President McCulloch, 526*
Programme of convention, 498, 514, 524
Ammeters, Arc light circuits. By Desmond, (D.) 100
Ammonia, Production by electric furnace. By Mehner, (D.) 788
Annealing and magnetic heterogeneity. By Ebeling, (D.) 314
Annealing iron and steel, by fusion, 107
Annunciator drop, Star, 262*
Antimony, Magnetization of alloys. By Weiss, (D. R.) 22
Arc lamps
Adams-Bagnall, 341
Ajax, rack feed, 640*
Alternating vs. continuous-current, (D.) 730
Carbons, Faults in. By Stine, 36
Direct-current, 233*
Excelsior "97," 793*
Feeding mechanism, 610*
General Electric series, 206*
Globe-lowering device, 150*
Graves new, 206*
Jandus. By Koerting and Mathiesen, (D.) 313; Toerring, 229; (D. R.) 535; 698
Arc lamps. (Continued.)
Long-burning, 469*
General Electric, 178*
Kinsman, 576*
Magic lantern, Beseler, 543*
Marine, General Electric Co., 765*
Perkins, Enclosed, 672*
Tests of, (D. R.) 499
Upton long-burning, 797*
Arc lighting
Mines, In. By Baxter, (D. R.) 82
Motor-generator and converter systems, (D.) 50, (D. R.) 109
Reactive system. By Spencer, (D.) 463
Rectifiers for, 241; By Hesketh, (D. R.) 257
Statistics, U. S., 185
Street service. By Blondel, (D. R.) 82
Arc switch, Utica, 115*
Arcs
Direct current in an alternating. By Gold, (D.) 337
Luminous efficiency. By Blondel, (D.) 141
Negative resistance, 98
Resistance of. By Frith and Rodgers, 727*; Gray, (D.) 698; (D. R.) 698
Temperature of carbon, (D.) 312
Voltaic. By Arons, (D.) 172
Armature coils, Eickemeyer, 288*
Armature currents, Load losses produced by. By Blathy, 128, 186, 188; Ryan, 272*; (D.) 201
Armature reaction. By Heyland, (D. R.) 760; Rothert (D.) 760
Armature teeth, T-shaped, 325
Armatures
Actions in, of three-phase motors. By Bauch, (D.) 367; Rothert, (D. R.) 432
Electrodynamic force in ironclad, Seat of the. By Houston and Kennelly, 1, 3*; Wolcott, 271; Baxter, Jr., 299, 332
Faults, Detecting. By Tinsley, (D.) 602*
Iron for, Selection. By Wolcott, (D.) 141
Ironclad, Seat of the electrodynamic force. By Houston and Kennelly, 1, 3*; Wolcott, 271; Baxter, Jr., 299, 332
Manufacture, Walker Co., 421*
Polyphase, New, 54
Reaction. By Behrend, (D.) 698; Braun, (D.) 668; Rothert, (D.) 400; Vogelsang, (D.) 668; Ziehl, (D.) 535, 698
Self-induction in. By Benischke, (D. R.) 82; Breslauer, (D. R.) 172, 312
Solid iron. By Dolivo-Dobrowolsky, (D.) 141
Torque of. By Wolcott, (D.) 141
Windings and connections. By Poole, (D. R.) 256
Windings, Walker Co., 453*
Armington & Sims Engine Co., Financial difficulties, 227
Association of Edison Illuminating Companies, Convention, 215
Atmospheric electricity. By Chree, (D.) 203
Aurora Borealis. By Ebert, (D.) 259
Australia as a field for electric suupply. By Dawson, (D. R.) 23

B

Balata industry in Dutch Guiana, (D.) 764
Ball engine, Crank and crank disc, 263*
Batteries
Autocar, 705*, 794
Carbon. By Fitzgerald, (D.) 111
(See also below, Jacques carbon.)
Double microphone, Wurtz system, (D.) 316
Family electro-medical. Jones, 56*
Gas. By Payson, (D.) 434
Hibbert, Temperature coefficient, (D.) 791
Jacques carbon. By Jacques, (D.) 701; Reed, 93, 98*, 137; Thomson, (D.) 669; (D.) 465, 733
McDonald, (D.) 762
Measuring E. M. Fs of. By Negreanu, 667, (D.) 370*
Microphone, Protecting. By Krueger, (D.) 370
Polarization and resistance of. By Streintz, (D.) 502
Terminals for zincs, (D.) 339
Thermo-electric. By Asher, (D.) 229, 535
Thermo-tropic, and a new method of developing electrical energy. By Reed, 158, 159*; (D.) 669
Velvo-carbon. By Allingham, (D.) 203
Battleships
"Bouvines," Electrical equipment, 341
"Indiana," Electrical features, 189*
Bearings, Meneely tubular, Albany street cars, 48*
Becquerel rays, 652
Bell Telephone Co. (See American Bell Telephone Co.)
Belt transmission, Fire risk, 588
Belts, Leather Manufacture of, 437*
Berliner Patent. (See Telephony.)
Bicycle electric light, 705*
Bicycles, Acetylene motors for, 27
Bismuth
Electric resistivity. By Dewar and Fleming, 34, (D.) 84, 464, 573
Resistance of, (D.) 21
Transverse effect in. By Beattie, (D.) 402
Bleaching. By R. K., (D.) 762
Bliss & Co., E. W.
Armature-disc cutters, 146*, 470*
Buffing machine, Automatic, 89*
Boiler management. By Lord, 611*
Boilers
Attachment for return tubular, 116*
Columbia Steam Boiler Co., 765*
Efficiency, capacity and smokelessness with low-grade fuels. By W. H. Bryan, (D.) 785
Natural waters and their effects in, 795
Zinc in, (D. R.) 260
Book Reviews
Alternating and Interrupted Electric Currents. Geo. Forbes, 467
Alternating-current Transformer in Theory **and Practice. J. A. Fleming, 54**
Chicago Main Drainage Channel. C. S. Hall, 792
Dynamo: How Made and How Used. S. R. Bottome, 23
Electric Arc Lighting. Edwin Houston and A. E. Kennelly, 341
Electric Lighting and Power Distribution. W. P. Maycock, 371
Electric Lighting Specifications. E. A. Merrill, 341
Electric Wiring Specifications for Incandescent Lighting. G. H. Kimber, 23
Electricity in Paterson. W. M. Brock, 792
Electro-Dynamic Machinery for Continuous Currents. E. J. Houston and A. E. Kennelly, 205
Engineering Index. J. B. Johnson, 467
Extracts from the Private Letters of the Late Sir Wm. Cooke. F. H. Webb, 286
How to Make and Use a Storage Battery. P. Warwick, 87
Theatrical Guide. Julius Cahn, 341
Magnetic Circuit in Theory and Practice. H. DuBois, 232
Miscellaneous Papers. Heinrich Hertz, 765
Physical Units. **Magnus Maclean, 286**
Poor's Manual of Railroads for 1896, 539
Press Working of Metals. Oberlin Smith, 54
Something About X-Rays for Everybody. Edward Trevert, 286
Street Railway Investments. E. E. Higgins, 176, 729
Street Railways, Electric. **E. J. Houston and A. E. Kennelly, 764**
X-Ray, or the Photography of the Invisible and Its Value in Surgery. W. J. Morton, 792
X-Rays. Edward Trevert, 792
Boosters. By Zander, (D.) 367
Alternating currents. By Russell, (D.) 699
Improvised, on Bergen Beach Ry. By Brown, 479.
Leonard patent, 797
Bottle-filling machine, Electrical, (D.) 260
Breithaupt, E. C., Sec., V. P. Can. Elec. Assoc., 8*
Breweries, Electricity in. By Goerling, (D.) 699
Bridge, Slide-wire Calibration. By Benecke, (D.) 87; Stine, 555*
(See also Wheatstone bridge.)
Bridges
Draw electrically operated, Utica, 115*, (D.)142
Electric railway. By Stowell, (D.) 143
Erie Canal, Utica, N. Y., Electric plant for operating draw, 115*, 142
Brill Co., J. G., Pivotal truck, 88*
British Association at Liverpool, 382, 383, 425, (D.) 466
Brooklyn Bridge
Electric cars on, 425, 735
Electric light plant, 371*
Brown, Jaeger & Co. Vise and winch, 27*
Brush Electric Co., Removal of plant, 405
Brushes
Crown woven wire, 703*
Multiplicity of, in large generators. By Baxter, Jr., 244
Selection of. By Wiener, (D.) 400
Brussels Exposition, 554
Budapest Exposition, Fountain, 517*
Buffing machine, Bliss automatic, 89*
Burners
Denayrouse gas, (D.) 463
New Era, American Electric Co., 23*

C

C. B. Attachment Co., Boiler attachment, 116*
Cable railway, Electrically driven, England, 470*
Cable testing apparatus, (D.) 404
Cables
Air-drying process for. By Weitlisbach, (D.) 402
Construction and design, 590
High conductivity, (D.) 401
High-pressure concentric. By Hetherington, (D.) 314; (D. R.) 537; (D.) 500.
Insulation resistance of railway. Measurement of. By Hewitt, 514, 515*; Houston and Kennelly, 169
Safety, for mines, (D.) 144
Specifications and tests. By Jeckel, (D.) 20; (D. R.) 174
(See also Telegraph Cables.)
Cadmium, Purifying. By Mylius and Fromm, (D.) 762
Calcium carbide furnace, (D.) 669

Calcium carbide in agriculture, (D.) 87
Calcium carbide
  Cost of, (D. R.) 205
    Estimating power factor. By Patten, (D.) 539
  Manufacture, (D. R.) 87
  Production by steam power. By Tenner, 605
Calibration of a bridge wire. By Stine, 555*
Calibration of alternating-current measuring instruments. By Wilkens, (D.) 315
Canadian Pacific Telegraphers' strike, 446
Capillary electrometer. By Vigouroux, (D. R.) 87
Car equipments, Daily inspection and care of. By Cahoon, 336
Car heating, Electric. By Puchta, (D. R.) 19
Car lighting, Electric. By Pohl, (D.) 282
  Accumulators, Dynamo on axle, (D.) 109
  Dynamo on axle, (D.) 788
  Moskowitz system, (D.) 602
Cars, Electric
  Bearings, Meneely tubular, 48*
  Brooklyn Bridge, 574*
  Buffet, Kirkwood, Mo., 255
  Compressed air, Hardie, 126, 139*
  Speed, efficiency of motors. By Baxter, Jr., 349, 364
  Sprinkling, Kensington, 610*
  Tests of heavy. By Curtiss and Pond, (D. R.) 143
  Typical, in U. S., (D. R.) 536
  Utilization, for special purposes, 125
Carbides, Metallic, 271; by Moissan, 558
  (See also Calcium carbide.)
Carbon
  Electricity direct from, (D. R.) 53
  Electrolytic dissolution and deposition of, (D.) 22
  Transformation of energy of, into other forms. By Reed, 33, 44, 74, 134*
Carbon circuit of incandescent lamp. By Marsh, 630*
Carbon cylinders. Porous, in electrolytic researches. By Loeb, (D.) 671
Carbon holder, Self-centering, 539
Carbon megohms for high voltages. By Mordey, (D.) 733
Carbons, Arc lamp, Faults in. By Stine, 36
Cardinal Satolli at Edison's laboratory, 489
Catalogue of scientific literature, International, 185
Cathode rays. (See Rontgen rays.)
Cells
  Carbon, without a metal electrode, 556; by Reed, 620
  Clark, Variations in the E. M. F., with temperature. By Ayrton and Cooper, (D.) 465
  Gas, Bucherer system, (D.) 671
  One-volt standard. By Hibbert, (D.) 111, 466
  Standard. By Carhart, 587, 665
Central station working. By Githens, 72; Walden, 302*
Central stations
  Accumulators. By Addenbrooke, (D.) 338; Klander, (D.) 761
  Europe, Output, 127
  Manchester, (D.) 760
  Zurich, (D. R.) 20
  (See also Accumulators; Railways, Electric, Accumulators.)
  Albany Street Ry., 48*
  Alternating current. By Wagner, (D.) 433
  Ashtabula Rapid Transit Co., 310*
  Belfast. By McCowen, 249
    Three-wire system. By McCowen, (D.) 230
  Block stations and. By Osterberg, (D.) 731
    Advantages. By Knocke, (D.) 572
  Bristol. By Blaikie, (D. R.) 500
  Brooklyn Nassau Ry., 363*
  Bury, Three-wire system, (D.) 669
  Charges. (See Charges for electric current.)
  Cheap, Johnson, Vt., (D.) 500
  Cleveland Electric Illuminating Co., 273*
  Combined lighting and traction plant. By Rider, (D.) 20, 789
    Hamburg, (D.) 143
  Croydon, (D.) 669
  Detroit municipal, (D. P.) 173
  Direct-current power, Italy, (D.) 142
  Economy. By Henning, 361
    Power from the trolley circuit. By Newton, 334
  Edison station in Brooklyn. By Barstow, (D. R.) 314
  Elmira, N. Y., Details of, 14*
  Efficiency. Total. By Merrill, (D.) 20
  Equalizer systems of distribution, (D. R.) 258
  Europe. Statistics, (D.) 368
  European practice. By Edgcombe and Fox, (D.) 401
  Extension of power to outlying districts. By Gibbings, (D.) 51
  Frankfort-on-the-Main. By Wagner, (D.) 464, (D. R.) 368, 500
  Gas engines, (D. R.) 500
    Belfast, Ireland, 328
    (See also Gas engines.)
  Germany, Statistics. By Rittershousen, (D.) 603, 110; (D. R.) 83, 283
  Gleiwitz, (D.) 789
  Hamburg, Ger., (D. R.) 20
  Hanover, Ger., (D. R.) 52, 314
  High voltage plants. By Stewart, 67; (D.) 257
    Advantages. By Barnard, 193*
    Alternating current practice, 2, 4
    New York Custom House, 69*
    Santa Monica, Cal., (D. R.) 367
  Insurance of, (D.) 464
  Johnson, Vt., Cheap, (D.) 500
  Kaiserslautern. By Laffargue, (D. R.) 314
  Lamp economy. By Blondel, (D. R.) 82
    (See also High voltage plants.)
  Lamps, Free, at Bradford station, (D.) 790
  Leyton, Gas engines, (D.) 731
  London, Accounts, (D. R.) 173
  Long Island Electric Illuminating and Power Co., 449*
  Management, System and forms. By Githens, 65, 72*
  Manchester, Storage battery, (D.) 760; (D. R.) 143
  Modern. By McCulloch, 564
  Neuchatel, Three phase, (D.) 283
  Newport, Alternating-current, (D. R.) 368
  Norwich, (D.) 635
  Paris, (D.) 603
  Paterson, N. J., (D.) 761
  Pittsfield Electric Co.'s plant, 97*, 106*
  Power from the trolley circuit. By Newton, 334
Central Stations. (Continued.)
  Rome plants, (D.) 230
  Rotterdam, An unusual system. By Mohl, (D.) 368
  South Shields, Alternating-current, 368
  Switchboard, engine and dynamo, Relative position of, 281
  Switzerland, at Bozen-Meran, 540
  Switzerland, Statistics. By Denzler, (D.) 540 (D. R.) 731
  Three-phase systems, Loss of voltage. By Heyland, (D.) 52; (D. R.) 174; Rasch, (D. R.) 83
  Two-phase plant, Hyde Park, Vermont. By Walden, 302*
  Vienna, Operating costs. By Goldenzweig, (D. R.) 401
  Wolverhampton, Eng., (D.) 20
  Zurich. By Jacquin, (D.) 433
    Accumulators, (D. R.) 20
  (See also Isolated plants; Railways, Electric, Transmission plants.)
Centrifugal machines. By Dieudonne, (D.) 730
Charging for electric current. By Gilchrist, (D.) 52; Wright, (D.) 19, 143; (D.) 500, 731
  Wright system. By Hale, 505; Hordern, (D.) 536; Pink, (D.) 536
Checking switchboard instruments. By Benecke, (D.) 538
Chemical analysis by means of the telephone. By Koethner, (D.) 403
Chemistry, Physical, The achievements of. By Noyes, 277
Chicago electrical trade, Meeting of, 227
Chlorate of potash, Manufacture at Niagara Falls. By Dunlap, (D.) 340
Chloride of silver test battery, 507*
Chloride of sodium, Electrolysis of, (D.) 501
Chlorides, Electrolysis of. By Andreoli, (D.) 86; Hulin, (D.) 339; Lunge, (D.) 340, 637
Chlorine, Manufacture of. By Mond, (D.) 501
Chucks, Magnetic, (D) 286
Circuit-breakers
  Alternate-current, 705*
  28,000-ampere, General Electric, 148*
  Proper use of. By Baxter, (D.) 230
  Wurts, 341
Circuit closer, Automatic, (D.) 146
Circuits
  Alternating-current, Induction phenomena. By Millis, (D.) 465
  Breaks, Electro-motive forces induced. By McKittrick, 10*
  Induction phenomena. By McKittrick, 10*
  Insulating resistance, Measuring of. By Muellendorff, (D.) 604
  Mechanical models of, 276
  Parallel,
    Alternating currents in. By Bedell, (D.) 537, 664
    Mutual induction. By Jackson, 325, 327
  Three-phase, Loss of voltage in. By Rodet, (D.) 761
  Three-wire, Generator for, 668
  Transferring energy in. By Houston and Kennelly, 683
Cleveland Centennial, Electricity at, 127
Cleveland Electric Illuminating Co., Plant, 273*
Cleveland Switch, New, 289*
Cliff Paper Co., Electric plant, 116
Clutch, Slipping, for electric driven punches, (D. R.) 142
Coal mines, Electricity in. By Ravenshaw, (D.) 19, 20
Coal, Output of the world for 28 years, 159
Coast defence, Electromagnetic, (D.) 764
Coils
  Rhumkorff, 12-inch, 148*
  Self-induction. By Wien, (D.) 316; (D. R.) 205
  Windings, Computations of. By Slingo and Broker, (D. R.) 21
Commutators
  Care of. By Wirt, (D.) 141
  Construction of. By Turner, (D. R.) 312
    Modern, (D.) 141
  Railway motor, 149*
  Resistance of. By Edsall and Rorty, (D.) 50; (D. R.) 82
Compasses
  Deviation on iron ships, (D. R.) 259
  Electrically operated, (D. R.) 87
Compressed air motors. By Baxter (D.) 432
  Competitor of electric motors, (D.) 50
  Efficiency. By Lundell, (D. R.) 110
  Future of, 1, 298
  Hardie system,
    Details, 126, 139*, 311, 332
    Rome, N. Y. By Haupt, (D.) 83; (D. R.) 143
  New York street railways, 513, 534
Condensers
  Adjustable, for high potentials. By Blake, 556*
  Alternating-current rushes in. By Berry, (D.) 315; Scattergood, (D.) 174, 202, 230, 259
  Capacity for short-charge periods. By Carpenter, (D.) 636
  Effect of, 45*
  High potential, (D.) 404
  Tesla system, (D. R.) 404
  Worthington self-cooling, 638*
Conductors
  Aluminum for, (D.) 700
  Calculation of. By Bochet, (D.) 83, (D. R.) 144; Gosselin, (D.) 202
  Cost of iron and copper. By Allen, (D.) 174
  Electric current in. By Silberstein, (D.) 84
  Underground, Use of old rails. By Rusling, 362
Conduits
  Electrical, Wooden pipes for, 467
  Vitrified clay, Camp, 544*
  Vitrified terra cotta, McRoy, 148, 286
Congressional library building lighting plant. By Hopkins, (D.) 536
Constants, Dielectric. By Ratz, (D.) 203
Contact-breaker for induction coils. By Paine, (D.) 402
Contact electricity. By Nernst, (D.) 339, 761
Contact resistance. By Wirt, (D.) 203
Controllers
  Series-parallel,
    Comparison. By Foster, (D. R.) 338
    Four-motor equipments. By Baxter, Jr., 77*, 198*
    Tests. By Decker, (D.) 83
  Steel Motor Co., 735*
Convention Hall, St. Louis, 18*
Copper
  Production, U. S., 1896, 128
  Relative cost with various systems, 493
  Standard, German, (D.) 111
Copper-depositing process. By Dumoulin, (D.) 316
Copper refinery, Anaconda, Mont., (D.) 403
Craighead flexible pole bracket, 27
Cranes
  Electric. By Anderson, (D. R.) 463
  Foundry, (D.) 142
  Traveling. By Adamson, (D.) 172
Cryptoscope screens. By Salvioni, (D.) 700
Curling iron heater, electric, 734*
Currents
  Changing the frequency, Gutmann's method, (D.) 314
  Due to magnetic flux. By Braun, (D.) 762
  Foucault, Effects of, on polar diagrams. By Bedell and Boyd, 75*, 132*
  Obtaining different kinds, Method of. By Patten, (D.) 50
  Thermo-tropic. By Reed, 158, 159*
  Wattless. By Blondel, (D.) 314, 369, 732
  (See also Alternating currents.)
Curve tracer for alternating currents. By Drexler, (D. R.) 86
